PRODUCT ELIMINATION

SALIVA COLLECTION PRODUCTS

Dear valued customer,

In the past months we have been confronted with manufacturing issues of our Saliva Quantification Kit (SQK) due to availability problems of some of its components. Different solutions have been reviewed, but unfortunately none were able to resolve the challenges of being able to supply the SQK in a timely manner. Furthermore, due a strategic shift in our organization's direction, the product will no longer be a focus in our organization. Additionally, the IVDR regulatory requirements have significantly increased the efforts on our side to ensure product compliancy with the new regulations.

Also, as our saliva collection product is designed to work as a system, both the collection devices and the quantification kit are needed together to deliver an appropriate result. If one part is missing, proper application of the product would not be possible.

Taking all this into account, it was decided to discontinue our saliva collection products, both the collection system and the quantification kit, without any alternative options. Please refer to the table below for more information on product availability:

Item numbers	Description	Last order until	Last delivery until
881001	Greiner Bio-One Saliva Collection System, single-packed, for self-testing consisting of: 881212, 881113 a. 881112	27 th January 2023	March 31st, 2023
